RESIDENTIAL AIR CONDITIONERS 2017

# CARRIER: THE INVENTOR

In 1902, Willis Carrier solved one of mankind's most elusive challenges by controlling the indoor environment through modern air conditioning. His invention enabled countless industries, promoting global productivity, health and personal comfort. For more than a century, our research, expertise and forethought has resulted in market-leading innovations. Today, Carrier's innovative air conditioning solutions are found across the globe and in virtually every facet of daily life. We have been creating comfortable and productive indoor environments, regardless of the climate outside. And these innovations mark just a handful of ways that Carrier works to make the world a better place to live, work and play. 2

# CYCLOJET

## POWERFUL INSIDE. BEAUTIFUL OUTSIDE.

Carrier's CYCLOJET is India's first outdoor AC unit that has a unique cylindrical design. This innovative design solution enhances performance and efficiency while easily fitting into any corner of your home.

### THE CYCLOJET ADVANTAGE:

**1. Innovative Design:** CYCLOJET's unique cylindrical design is an 'Industry first' in home air conditioning solutions. The 360 degree flow of air gives the best in-class performance and helps cool indoor temperatures faster.

**2. Slick, State-of-the-art and Silent:** CYCLOJET dissipates hot air vertically – it doesn't feel hot even if you're standing next to it. Strategically placed rubber grommets and extra thick insulation also ensure reduced vibrations and noise.

**3. Better Condenser:** A bigger\* and better quality condenser with a 360 air suction ensures that every Carrier AC that comes fitted with a CYCLOJET outdoor unit is 10% more efficient than conventional outdoor units.

\*33% larger condenser area – based on internal test against standard Carrier 12K, 3 star machines.

**4. Compact:** CYCLOJET takes up to 40% lesser space, making it easier to install, maintain and maneuver. Designed specifically for India, it's great for houses that have a space constraint.

**5. Efficiency In All Weather:** The machine comes equipped with a F - class\* and IP – 44 waterproof motor. Hence, it is more reliable and dependable under even the most extreme weather conditions.

\* Not applicable for 22K 5 star

**ROUND  
THE CLOCK  
CARE**  
1800 3011 1111

## ROUND-THE-CLOCK CARE. THE CARRIER ADVANTAGE.

DAY

WIND

WINTER

NIGHT

RAIN

SUMMER

At Carrier, we are always ready to provide round-the-clock service, just in case in you might need it. Our dedicated assistance team swings into action immediately to respond to any emergency call and reach your doorstep in no time. So, be it good weather, or bad. 3 PM or 3 AM. Be it monsoon rains or in sweltering summers. Or even in the middle of a wintery night. We are always with you. Round-the-Clock.

# HOT & COLD AIR CONDITIONERS

Carrier Hot & Cold ACs provide a year-round solution for a comfortable home. It has never been easier to keep your home cool in summers and cosy in winters! When you select the Heat mode, Carrier Hot & Cold ACs transfer heat by circulating refrigerants through a cycle of evaporation and condensation.

## COOLS IN SUMMER

With the outbreak of summers, the scorching heat becomes intolerable and rises with each passing day. Carrier air conditioners put your worries to rest and let you forget these hassles with the fast cooling technology. Just put the AC on cool mode and say goodbye to the summer heat.

## COMFORTABLE, DRY COOLING DURING MONSOONS

Monsoon is the time when increased levels of humidity add to the weather woes. With increased humidity, there's a lot of sweating which makes things extremely uncomfortable. Carrier Air Conditioners help you experience comfort by tackling moisture and setting the right temperature.

## HEATS UP THE ROOM DURING WINTER

Nothing can beat the comfort of sitting in a warm and cozy room on a chilly winter evening. The Heat Mode enables Carrier's Hot & Cold AC to do the same by circulating hot air inside the room. No more worrying about the chilly weather, our air conditioners will handle it for you.

### POROUS MEMBRANE AIR FILTER

## i-PM 2.5 FILTER

Particulate matter 2.5, or PM 2.5, is composed of tiny particles dispersed in the air that are less than two and a half microns in width. Exposure to these particles, over a long term, has been associated with an increased rate of chronic bronchitis, a reduced lung function and an increased mortality from lung cancer and heart disease. People with breathing and heart problems, children, and the elderly can be particularly sensitive to PM 2.5.

### COMMERCIAL FIBROUS AIR FILTER

The Intelligent PM 2.5 Filter (i-PM 2.5) is a transparent filter for indoor air protection that uses natural passive ventilation to effectively protect the quality of indoor air. It has been developed using an Activated Carbon Fabric and silver mesh, which filters out all bacteria sized 2.0  $\mu\text{m}$  in length and 0.25-1.0  $\mu\text{m}$  in diameter. Besides the strong anti-bacterial property of silver, this filter has been especially designed based on the size variations of these micro-organisms.

### TRANSPARENT AIR FILTER

By controlling the surface chemistry we are able to increase the capturing possibilities due to the microstructure of air filters. This also enables strong PM adhesion, with greater than 95.00% removal of PM 2.5 under extreme hazardous air-quality conditions.

## HYPER PROTECTIVE FILTER

The Hyper Protective Filter has three different properties: anti-allergen, anti-oxidant and negative ions. Together, these properties form a strong basis for a pure surrounding.

Titanium dioxide is a known anti-allergen agent, capable of deactivating allergens such as mites and pollen.

Negative ions help freshen and purify the air by removing allergens such as pollen, mould spores, dust and animal dander.

It also enhances your sense of well-being and mental clarity by removing the debilitating effects of excessive positive ions in the environment. It has been reported to normalise your breathing rate, decrease blood pressure and relieve tension.

# CARRIER INVERTER

## DC INVERTER

With spiraling energy costs, staying comfortable during extreme temperature conditions can sometimes cost a fortune! Carrier Inverter ACs have been designed keeping exactly this in mind; to meet critical requirements and combat the operating cost while providing efficient and customised air conditioning.

### SAVING

The accurate digital power control and super-efficient compressor helps in saving high amounts of energy on a regular basis.

### QUIET OPERATION

Superior reliability and quieter operation, due to the advanced DC Inverter compressor.

### COMFORT

Gives you unmatched comfort by quickly achieving the desired room temperature and helps in maintaining it for a longer period of time.

Packed with advanced features, Carrier Inverters automatically adjust their capacity based on the requirement of the room they are cooling - drawing much less power and consuming lesser unit of electricity. When we look at conventional air-conditioners, they consume most of their energy to start up whereas Carrier Inverter air conditioners regulate and adjust their speed depending on the temperature requirement, which results in lesser energy consumption.

## CARRIER INVERTERS PROVIDE A RANGE OF ADVANTAGES OVER CONVENTIONAL ACS:

NEXGEN DEHUMIDIFIER

FAR QUICKER TO ACHIEVE DESIRED TEMPERATURE

ELIMINATION OF TEMPERATURE FLUCTUATIONS THEREBY MAXIMIZING COMFORT LEVEL

ENVIRONMENT FRIENDLY

HIGH ENERGY SAVINGS AND LOW ELECTRICITY BILLS

PURIFIED AIR WITH ADVANCED IONIZER AND CLEANSER

MUCH QUIETER

ADVANCED FILTRATION SYSTEM

MY MODE

IN-HOUSE MANUFACTURING

LARGE OUTDOOR FANS

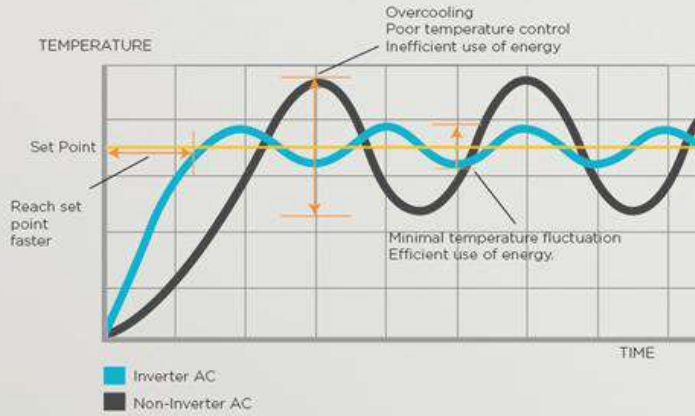

100% COPPER COILS

HIGH ENERGY EFFICIENCY

### Inverter AC Vs Fixed Speed:

The Bureau of Energy Efficiency (BEE) has introduced a new star rating methodology called Indian Seasonal Energy Efficiency Ratio (ISEER) for Inverter air conditioners. This evolved rating methodology factors in variance in higher temperature in India and rates air conditioners accordingly. Consumers can now purchase air conditioners with higher efficiency leading to lower electricity bills.

**ISEER Table for Inverter AC**  
Valid from 29/06/2015 to 31/12/2019

Star Rating	Minimum ISEER	Maximum ISEER
1 Star	3.10	3.29
2 Star	3.30	3.49
3 Star	3.50	3.99
4 Star	4.00	4.49
5 Star	4.50	

**EER Table for Non Inverter (Fixed Speed) AC**  
Valid from 1/01/2015 to 31/12/2017\*

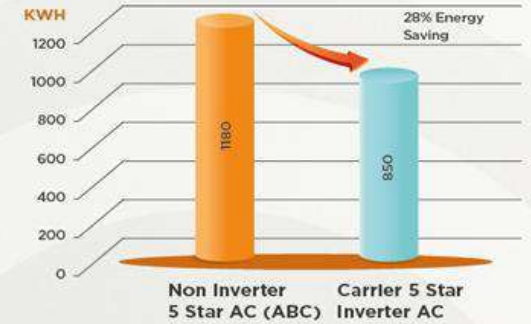

Star Rating	Minimum EER	Maximum EER
2 Star	2.9	3.09
3 Star	3.1	3.29
4 Star	3.3	3.49
5 Star	3.5	

\*Rating based on ISEER have been introduced on a voluntary basis for Inverter Air Conditioners since June 2015 and will be mandatory from 1st Jan, 2018. Also it is proposed to be merged with fixed speed air conditioners in the mandatory regime from 1st January 2018.

### INITIAL INVESTMENT

### ENERGY CONSUMPTION OF 1.5T IN A YEAR

\* Energy consumption has been calculated as per ISEER-1600 hr running annual power consumption for both Non Inverter and Inverter AC

\*\* Calculation has been done on the basis of bin temperature, no. of hours and full & half load calculation as per BEE

### RUNNING COST

**Initial Investment can be recovered in approx. 3 years**

\* Cost calculated at the rate of Rs.7 per unit consumed

## CONVENIENCE

### SUPER TURBO MODE

This function helps cool the room quickly by continuously operating at the maximum fan speed. In any machine, the regular 'Turbo Mode' operates for a maximum of 20-30 minutes, whereas the 'Super Turbo Mode' runs continuously. Super Turbo Mode is recommended for effective cooling during high ambient temperatures.

### 24 X7 TIMER

The unit can run on automatic mode using the 24-hour timer, which programs the unit to start and stop at pre-assigned times.

### INTELLIGENT CRF ALERT

The Intelligent CRF (Cleaning and Replacement) Alert can be used throughout all seasons to protect your air conditioning from damage. If you or someone in your family is allergic to dust and mould then keeping your air filters clean and replacing them at regular intervals can drastically reduce the risk of triggering any allergy attack.

### NEXGEN DEHUMIDIFIER

Mould and mildew are types of fungi which can thrive in humid areas and can pose numerous health risks. The NeXGen Dehumidifier allows the air conditioner to reduce the humidity of a specific room whilst retaining its cooling capability, keeping the room at a comfortable temperature.

### I-SENSOR

The temperature sensed by the indoor unit is always different from the actual floor temperature due to different installation heights of the indoor unit. This function revises these differences, ensuring accurate temperature control.

### SLEEP MODE

An energy-saving mode, it gradually increases the temperature while you sleep. This slight, gradual increase in temperature, without affecting your comfort level, brings down the energy consumption of the unit, and consequently lowers your power bill.

### FOLLOW ME

When this feature gets activated, the room sensor of the air conditioner takes a back seat as the inbuilt rooms sensor that's placed within the remote control gets activated. This allows the air conditioner to adjust to the ambient temperature around the remote control.

### MY MODE

Staying just as cool as you want has never been easier. MY MODE allows you to save your preferred mode, temperature & fan speed settings and activate it at the click of a button. No more beeps!

## DEPENDABILITY

### REFRIGERANT LEAKAGE DETECTOR

The early warning system detects refrigerant leakage and immediately turns off the AC while simultaneously displaying the relevant error code on the indoor unit.

### AUTO DETECTOR

If the unit malfunctions for any reason, it will shut off automatically while indicating the relevant error code on the indoor unit, enabling fast servicing.

### RUST SAFEGUARD

Equipped with five unique layers of protective coating to ensure complete protection from rust, the AC cabinet can withstand extreme weather conditions and serve you for years to come.

### HYDROPHILIC BLUE FINS

Low temperature in the evaporator might result in water condensation, leading to accumulation of dust particles, thereby affecting the performance of the AC. The hydrophilicity in the evaporator blue fins doesn't allow condensed water to accumulate, leading to a reduction in the accumulation of dust particles and improvement in the cooling performance of the AC.

## WELL-BEING

### I-OXIDIZER

Minimising exposure to formaldehydes is a significant consideration for health and well-being. This filter is multifaceted as it is capable of removing the same along with VOCs, chemicals and vapours with a specialised blend of oxidising agents.

### ELECTROSTATIC CARBON FILTER

This filter is made up of an Electrostatic Fiber and an Active Carbon Filter. The Electrostatic Fiber Filter removes small dust particles and smoke to prevent allergic diseases whereas the Active Carbon Filter deodorises peculiar smells and absorbs poisonous gases.

### ADVANCED E4 IONIZER

Releases negative ions to disinfect and diminish bad smell in the room, thereby helping you breathe cleaner and purer air.

### MULTI-STAGE CLEANSER

To prevent the breeding of bacteria inside the unit, this function ensures that there is no dust or water retained inside. The unit first uses condensed water to remove the dust from the evaporator fins, and then it switches to fan-only mode to blow away the wet air. The whole process disinfects the indoor unit and ensures that all traces of bacteria are removed.

## SUPERIA 365 INVERTER

Heating & Cooling | Available in 3kW (1.0), 5kW (1.5) & 6kW (2.0 Category)

- |                |                 |                        |                      |                              |                     |               |                        |            |            |

### I-SENSOR

The temperature sensed by the indoor unit is always different from the actual floor temperature due to different installation heights of the indoor unit. This function revises these differences, ensuring accurate temperature control.

### 4 STAGE IONIZER

When the 4 Stage Ionizer function is activated, it releases negative ions to disinfect any bad smell in the room. It also attracts and removes house dust, pollen and other micro particles responsible for allergies. These ions, therefore, help in creating a safe, healthy, and relaxing environment.

### REFRIGERANT LEAKAGE DETECTOR

The early warning system detects refrigerant leakage and turns off the AC while simultaneously displaying the relevant error code on the indoor unit.

### CARBON FIBRE FILTER

With Active Carbon and an Electrostatic Fibre Filter, the unit constantly scrubs away bad odour and poisonous compounds while preventing dust particles and other allergens from entering the air flow system.

AVAILABLE IN:

# DURANXT

Available in 3kW(1.0), 5kW(1.5) & 6kW(2.0 category)

**AUTO RESTART**

# ESTRELLA

Available in 3kW(1.0)

- VITAMIN C FILTER
- POWERFUL AIR FLOW
- ENERGY SAVER
- EASY CLEAN
- EXHAUST COMMAND
- SMART DIAGNOSIS
- SLEEP MODE
- AUTO SWING
- AUTO RESTART
- NEXGEN DEHUMIDIFIER
- LED
- BUILT-IN SLINGER
- 24X7 TIMER
- HYDROPHILIC BLUE FINs

## VITAMIN C FILTER

The Vitamin C Filter disperses minute particles of Vitamin C into the air that helps soften the skin and reduces the stress level.

## SLEEP MODE

An energy-saving mode, it gradually increases the temperature while you sleep. This slight, gradual increase in temperature, without affecting your comfort level, brings down the energy consumption of the unit, and consequently lowers your power bill.

AVAILABLE IN: 3 STAR for 3kW(1.0)

# ESTRELLA

Available in 5kW(1.5) & 6kW(2.0 category)

- 4-IN-1 FILTER
- POWERFUL AIR FLOW
- ENERGY SAVER
- EASY CLEAN
- EXHAUST COMMAND
- SMART DIAGNOSIS
- SLEEP MODE
- AUTO SWING
- AUTO RESTART
- NEXGEN DEHUMIDIFIER
- LED
- BUILT-IN SLINGER
- 24X7 TIMER
- HYDROPHILIC BLUE FINs

## 4-IN-1 FILTER

The 4-in-1 Filter is a combination of a Dust Filter, an Electrostatic Filter, a Carbon Filter, and a Zeolite Filter. This unique filter guards against harmful airborne mould such as dust, pollen particles, harmful gases and odour.

## ENERGY SAVER

The Energy Saver function shuts off the fan motor whenever the compressor is switched off. This saves the power consumed by the fan motor.

AVAILABLE IN: 5 STAR for 5kW(1.5) category

3 STAR for 5kW(1.5) & 6kW(2.0) category

2 STAR for 5kW(1.5) category

## SMART DIAGNOSIS

In case of any fault in the air conditioner, this function will diagnose it immediately and turn off the AC to protect it. It also indicates protection and error code by displaying it for fast service.

## ENERGY SAVER

The Energy Saver function shuts off the fan motor whenever the compressor is switched off. This saves the power consumed by the fan motor.

## ENERGY SAVER

The Energy Saver function shuts off the fan motor whenever the compressor is switched off. This saves the power consumed by the fan motor.

## NEXGEN DEHUMIDIFIER

Mould and mildew are types of fungi which can thrive in humid areas and can pose numerous health risks. The NexGen Dehumidifier allows the air conditioner to reduce the humidity of a specific room whilst retaining its cooling capability, keeping the room at a comfortable temperature.
